EXPERIENCE IS WHAT MATTERS

Our goal is to provide the perfect inviting atmosphere for you and your guests. Our hand crafted and patented water features announce the pride, partnership and enjoyability that people remember.

With quality, dedication, and longevity, we produce thousands of designs in styles of Rain Curtains, AquaFalls™, WaterPanels™, and Aquariums. All custom crafted to enhance and beautify.

From concept to completion our craftsmanship allows your guests to relax while experiencing What matters: A beautiful and inspiring environment.

As one of the most experienced water feature manufacturers in the country, we offer you uncompromised service throughout the design, construction, installation, completion and service stages of your project with the highest quality materials and design services.

WHAT WE DO

Midwest Tropical specializes in building the finest hand crafted water features in the country. Our state of the art design studio and manufacturing facility in Chicago allows us to customize each project to its specific specifications.

Our team of talented designers and engineers have over thirty years of experience working with clients from the conceptualization of a design to utilizing the best material available in the market today including natural stone, stainless and copper metals, acrylic, glass, mirrors, tiles, and custom logos to produce a custom tailored feature that best enhance your decor elegance.

Over the years, our stunning custom water features have been center pieces and focal points for various hotels, restaurants, spas, medical offices, commercial buildings, and homes.

WHY CHOOSE US

At Midwest Tropical we are committed to delivering the highest quality of designs and client services. We are proud of our 30+ years in the water feature manufacturing industry.

Our team of talented designers and engineers have worked with hundreds of interior designers and architects nationwide, and have helped them bring their unique vision for each project to a full turn-key "Water Art" reality.

Our client services team members have earned the reputation of being the best in the industry when it comes to clients satisfaction from the beginning to the end of each project.

HOW WE DO IT

The design process begins with an open canvas where we present you with preliminary options or receive your design -

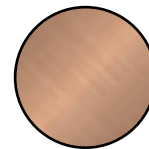

- AutoCAD drawings will be supplied which specify the components, finishes and dimensions of your water feature.
- Expert recommendations on material selections will be chosen to fit your budget.
- Your designated project manager will keep you updated as your feature enters production with photos and updates throughout the process in Midwest Tropical's state of the art manufacturing facility and will include testing and inspection by our Quality Control Managers.
- Your feature will be packaged in a custom shipping container and your project manager will work closely with you to schedule shipping and an optional installation time line that works best for you.

These are just a few of the quality materials we use:

natural stone

copper

stainless steel

tile

glass

scored acrylic
